I would not recommend this game at this stage.

Having nearly 400 games through Steam, from all walks, nigh on every genre, from the oldest to the newest, from the smallest to the largest and absolutely everything in-between, and I have not had a single problem running them...

Except for this.

I get 2 credit-intro screens and it crashes, it doesn't throw an error and doesn't crash to desktop, it just dies and sits there, I even waited for 6-7 minutes at one point. I have reset my native resolution down to various levels of small, and still nothing.

There doesn't seem to be much talk on the topic nor and support for such issues.

If I cannot run this game, then there is something wrong on the games end itself.

I was looking forward to checking this game out, but if I can't even play it I have to tell others to avoid it. Why pay for something that does not work?. I strongly recommend this game for any fans of the original Myst or just fans of open-world puzzle solving in general. RHEM provides you with a huge, sprawling complex to explore, and while the plot is pretty much non-existent until the very end of the game, the puzzles and the satisfaction from understanding the game world and its intricate paths is more than enough to keep you going.

One issue, and really the only big issue for me, is that the game will often require you to loop back or retrace your steps through some areas, which can be a pain in the butt because of the intricate and gated nature of the different areas. Be prepared to click through the same screens a lot. A lot.

If you can look past the above, then do yourself a favor and pick up this game. If you do, here is a clarification that may keep you from misunderstanding a certain puzzle and being lost for like 4 hours: Some buttons can be held down.. Not impressed - Here is a video of me not being impressed: <https://www.youtube.com/watch?v=SuHdQTOK12w&t=84s>. [I really, really want to recommend this game, but the lack of songs as well as the low support from developpers make me want to give it a negative review.](#)

[Ultrastar, currently, does a better job and is free. This is sad because this game has huge potential.. I like the protagonista, she's cute somehow.](#)

[Works much better than the first one, no glitches with clicking ladders etc.](#)

[They got rid of the annoying Mr. Book.](#)

[Puzzles are much harder - yay!](#)

---{Story}---

- 
- Doesn't have (Not counting historical stuff)
  - Something isn't nothing I guess
  - Not great
  - Average
  - Good
  - Lovely
  - Will make you cry or smile a lot

---{Game Time}---

- Long enough for a cup of tea
- Short
- Average
- Long
- Depends on you
- Endless

---{Bugs}---

- Never had any
  - Minor bugs
  - Few bugs
  - Can get annoying
  - Ruining the game
  - The game itself is a big terrarium for bugs
  - Bad AI bots. Fun game if you want something to do with internet friends.. It is incredible... An amazing idea for naval battles in 1880's, before world fleets evolved into all metal goliathans, turned super boring with only four playable scenarios: no campaign, no skirmishes. After you play the four scenarios, then what? Also, the shooting disturbs me: you can't control the ship's shooting and they can run away from the main fleet, so you can't even control each ship's movement. Da♥♥♥♥?. I love the idea behind this game.
- the problem with this game is it isnt alot of fun, unless you are a super hardcore basketball nerd you will not like this game, there is so much potential but it feels like it is missing something.

Games go for too long.  
plays are hard to design.  
seems so long and drawn out.

unless you are basketball obsessed this isnt for you. I tried to fly this and the chopper crashes within 5 seconds?? Im not sure how to stop this, so I cant play the game at all. I have tried different manouvers flying low and turning but it explodes which tends to make it boring as it dosnt help you or tell you how to hover or fly safetely except to remain below a certain height. I didnt even intend to buy this game some how it was in my checkout when I purchased another game. If I can get the patience to try to work out how to fly it with out crashing andhaving to restart every five seconds maybe I will be able to write something positive.. Played trough the bad unity mobile port in ~30 min and the screaming was annoying as hell. I bought it for 0.89\u20ac and it's not worth it. -10V10

They where to lazy to convert the ingame achievements to work with steam.  
Quick cash grab for the Devs.
